

Filter combination FK06

This rinsable filter combination ensures a continuous supply of filtered water. It prevents the ingress of foreign matter such as particles of rust, strands of hemp and grains of sand. The accumulation of foreign particles in the base of the filter bowl can be easily removed by reverse rinsing.

Body material	: Brass
Spring bonnet material	: Synthetic material
Connection	: External threads
Max. temperature	: 40°C
Operating pressure	: 16 bar
Integral filter	: 100 micron
Pressure set-point range	: 1.5 - 6 bar
Mounting position	: Horizontal, filter bowl downwards

Special features:

- A turn on the adjuster knob is all that is required for setting
- The setting is directly readable from the setting indicator
- Filtered water supply maintained even during rinsing
- Inlet pressure balancing - fluctuating inlet pressure does not influence outlet pressure
- Filter and complete filter bowl are replaceable
- The adjustment spring is not in contact with the water
- Simple assembly
- Including couplings, without manometer

Connection	: 1/2" - 15 mm	N° 50035
	: 3/4" - 20 mm	N° 50036
	: 1" - 25 mm	N° 50037
