

Thermostats

MECHANICAL THERMOSTATS

Reliable and accurate thermostats for heating, cooling and ventilation control in poultry and pig houses. These thermostats have a large spiral for rapid response to temperature changes and 1 clear temperature scale. The case is completely closed and weather-resistant.

660-T16

M1 Thermostat

Single thermostat.
Temperature range: 0-40°C.
Differential: 1-1.5°C.
Maximal load: 16 amp, 250 Volt.

660-T16-2

M2 Thermostat

2 thermostats in 1 case. Each thermostat can be individually adjusted.
Temperature range: 0-40°C.
Differential: 1-1.5°C.
Maximal load: 16 amp, 250 Volt.

660-T164

M4 Thermostat

4-Step thermostat. Each additional 1°C temperature rise above set-point will switch one contact or opposite.
Temperature range: 0-40°C.
Differential: 1-1.5°C per step
Maximal load: 15 amp, 250 Volt.
